

## Chairman's Report

I am pleased to report that the third quarter was the strongest in the current calendar year for Guardian Holdings Limited ("GHL"). In this quarter, the Group earned after tax profits of \$14.2 million, contributing, as they did, an additional 6 cents of basic earnings per share. The principal contributor to these excellent results was our insurance business that had a particularly strong quarter. Top line, or gross premiums written, amounted to \$168 million and grew 14% quarter over quarter due to strong life sales and new acquisitions.

After tax profits for the year to date amounted to \$30.7 million. This equates to basic earnings per share of 13 cents. The commensurate period in 2012 resulted in after-tax profits of \$46.9 million. However, any comparison must take into account the costly challenges faced in our investment activities in the current year and favourable events last year. Shareholders will recall that the prior two quarters were negatively affected by the Jamaican debt exchange in the first quarter and fair value movements in the second. These two items amounted to a loss of \$11.4 million. On the other hand, last year GHL had positive realised gains and fair value movements totaling \$2.7 million.

Our core insurance operations realised good profits that are up 8% year over year. In addition, gross premiums written year to date amounted to \$599.8 million versus \$523.6 million over the comparable period, an increase of 15%.

We have maintained our growth trend and the Group's assets have increased by \$76.5 million year to date and now stand at \$3.567 billion. Total equity attributable to shareholders amount to \$507 million and all its subsidiaries continue to operate well above minimum regulatory capital levels.

### Insurance Activities

We have completed the integration of Globe Insurance Company of Jamaica Limited ("Globe") and our Jamaican insurance company, West Indies Alliance Insurance Company Limited forming Guardian General Insurance Company of Jamaica Ltd. We are also in the process of integrating Royal & Sun Alliance Antilles N.V. ("RSA") into our Dutch operations. Both Globe and RSA have already been consolidated into the Group's results.

These transactions contributed \$2.6 million to our after tax profits; however, after taking into account one-off acquisition expenses, integration, and direct financing costs, these transactions have to date produced an all-in loss of \$0.5 million. However, by year-end these acquisitions are expected to be fully accretive to earnings and will be supplemented with income, expected in the fourth quarter, from the distribution agreement with MCB bank, which formed a part of the RSA purchase.

Further, our core insurance underwriting and sales activities continue to perform very well. In our Life, Health and Pensions segment, Guardian Life of the Caribbean Limited is on track to better its all-time annual individual life sales record, and by a significant amount. This is a tribute to our life sales agency force. In Jamaica, despite the continuing difficult economic environment, we expect to hit our sales quota for the year. In the Dutch Caribbean, we have gained significant market share in Aruba due to the introduction of a mandatory pension scheme. This has helped to increase the top line. In our General Insurance Segment, despite continued soft market conditions, Guardian General Insurance Limited continues to outperform its peers as regards combined ratio and profitability while growing its top line modestly. The Dutch Caribbean's general insurance operations continue to produce underwriting profits while their expansion into the Netherlands, including their acquisition of Thoma, has helped drive top line growth.

Our discontinued UK operations are running off profitably and the amount of outstanding reserves continues to drop off dramatically. We ended 2012 with \$64 million in reserves while as of the end of September 2013 reserves stand at \$34 million. Much of this decrease derives from the sale of our old Jubilee motor syndicate. We anticipate entering a similar sale of our Jubilee property syndicate over the coming months. Once achieved this would extinguish our entire Jubilee at Lloyds syndicate exposure.

### Investment Activities

The Group's earnings, like those of insurance companies around the world, are largely impacted by their investment results. The prevailing low interest rate environment negatively impacts insurers in many ways, from depressed investment income levels to their reserves for anticipated future claims and pension benefits. In fact GHL's investment income is down \$2.3 million, or 2%, on a year to date basis as bond maturities are re-invested at lower yields. As the Group anticipates interest rates to increase over the mid-term we have purposely kept an overweight in cash and short term obligations in order to take advantage of better yields. While this hurts our investment performance in the short term, over the longer horizon, it will benefit our results.

Within our Strategic Investment area, Pointe Simon continues progressing on many fronts. Construction-wise the project is approximately 85% complete, with the fit-out of the 21 storey office tower being the major part of the unfinished works. On the commercialisation front we have secured French government subsidies for the hotel complex that will facilitate the closing of the sale of the hotel. The condominiums were finished during the quarter with the outfitting of kitchens and we anticipate them to be fully occupied within the next six months. These transactions will begin returning cash to the Group. The aforementioned office tower is the biggest variable at this time as we will be bringing 15,000 square meters of office space into the market. Consistent with our accounting treatment for these types of investments, we currently are making preparations for our annual year-end valuation exercise. The estimates of absorption rate and lease income will determine year-end carry values. Should these estimates vary from last year's figures, we will need to make non-cash accounting adjustments.

In summary, we had a very solid quarter driven by our insurance underwriting and sales activities. We expect our three recent acquisitions to be fully integrated into the Group and make a positive contribution to the bottom line. We anticipate enhanced results from our insurance activities as the investment climate improves. The effects of the disposal of our legacy business are quickly diminishing. We are now in a better position to concentrate our efforts on the future growth and profitability of all sectors of our business and to continue to add shareholder value.

I wish to thank our shareholders who continue to stand by us and to pay tribute to our Board, management and supporting staff for their dedicated service, with a special word of thanks to our life insurance sales agency force.

**Arthur Lok Jack**  
Chairman GHL

## Note 1: Basis of Preparation

The summary consolidated financial statements are prepared in accordance with criteria developed by management. Under management's established criteria, management discloses the summary consolidated statement of financial position, summary consolidated statement of income, summary consolidated statement of comprehensive income, summary consolidated statement of changes in equity and summary consolidated statement of cash flows.

These summary consolidated financial statements have been prepared in accordance with the accounting policies set out in "Note 2" of the 31 December 2012 audited financial statements consistently applied from period to period. Any new Accounting Standards or interpretations which became effective in this financial year have had no material impact on the Group. The areas of critical accounting estimate and judgement as disclosed in "Note 3" of the 31 December 2012 audited financial statements, have also remained unchanged.
